## Product Designer | UX Training Facilitator | Design-to-Engineering Liaison

Mission-driven UX designer who thrives in fast-paced, collaborative environments, developing accessible, intuitive digital products that resolve real user issues. Fluent in Figma and experienced leveraging generative AI to accelerate ideation and iteration. Background working from initial strategy through launch, transforming ambiguity into clear, scalable design systems through design thinking, research, and prototyping. Trusted partner to product and engineering teams, balancing form and function with attention to detail from concept through delivery. Strong communicator, adept at leading workshops and presenting critiques that align teams based on shared goals, values, and long-term impact.

**Design:** Interaction Design, Mobile Design, Design Systems, Prototyping, Accessibility, Visual Design  
**Collaboration:** Stakeholder Management, Cross-functional Leadership, Workshop Facilitation, Training/Mentorship  
**Tools:** Figma, Sketch, HTML, CSS, JavaScript, Claude AI, ChatGPT AI, Gemini AI  
**Research:** User Research, Usability Testing, Competitive Analysis

---

## Professional Experience

### LATI CREATIVE

#### Visual and UX Designer (Nov 2020 – Present)

- Managed end-to-end client relationships for small businesses and nonprofits, defining brand identities and designing digital experiences. Recent clients include The Bearings Group, Be-Veda, and YYZData.
- Owned brand and web design projects independently, from initial client consultation through final delivery, building trust through consistent communication and clear design rationale.
- Designed logos and websites in Figma, leveraging generative AI tools (Claude, ChatGPT) to accelerate ideation, iteration, and brainstorming.

### CAPITAL ONE

#### Product Designer, Identity & Authentication (Sep 2024 – Nov 2025)

- Designed mobile authentication experiences with product managers, engineers, researchers, content designers, data scientists, and legal teams to balance security with usability.
- Utilized internal Gemini AI tools for ideation, user research, and data analysis.
- Devised Interactive OTP (iOTP) mobile authentication flow that reduced user confusion and increased adoption of more secure verification methods. Leveraged research insights to help users understand multi-step processes. Projected 20% improvement in user success rates following upcoming experiment launch.
- Drove cross-functional alignment by presenting design rationale and research findings to stakeholders, navigating competing priorities across legal, security, and UX teams.
- Led early-stage visioning in Figma for Capital One's Challenge App (the second most-visited authentication experience behind login) to establish strategic direction for modernizing the interface. Facilitated cross-functional workshop to align stakeholders on long-term vision and presented strategic direction to leadership, including user pain points, opportunities, and design recommendations.
- Designed the end-to-end authentication experience in Figma for AirKey, an NFC tap-to-verify product for customer service agents, informed by field research and built within Capital One's agent-specific design system.
- Mentored design intern on research planning, interaction design, and collaboration in large, complex organizations.

### AMERICAN EXPRESS

#### Product Designer, AP/AR (Jul 2023 – Jul 2024)

- Designed self-service help center for One AP using Figma, an accounts payable product, reducing customer service calls and enabling business owners to resolve issues independently.
- Ran discovery workshop with product, engineering, and content teams to align on requirements and direction.
- Designed and tested 2 design prototypes (i.e., full-page and sidebar) with 6 users to proactively validate approach.

# Latika Gulati

Page 2 | 415-417-9967 | [latika.gulati.0@gmail.com](mailto:latika.gulati.0@gmail.com) | [linkedin.com/in/latikagulati](https://www.linkedin.com/in/latikagulati)

- Strengthened stakeholder buy-in by presenting research findings and design trade-offs between competing concepts.
- Designed a scalable navigation system to accommodate future content without search functionality.
- Handed off accessibility-compliant designs to developers and supported quality assurance (QA).
- Contributed to AR Hub integration following Nipendo acquisition, combining AR products alongside Nipendo's team.
- Designed wireframes, prototypes, and interfaces for AP and AR products using Figma within Amex Design Library and WCAG accessibility standards.

## GENERAL ASSEMBLY

### **UX Design Instructional Associate** (*Mar 2022 – Mar 2023*)

- Taught weekly lessons to groups of ~30 students across 3 cohorts, covering UX concepts, processes, and collaborative design methods.
- Coordinated guest speakers and panels with industry professionals, encouraging networking opportunities.
- Sourced real-world clients to provide students with hands-on UX experience.

## CAPITAL ONE

### **Software Developer** (*Aug 2016 – Jan 2022*)

- Redesigned KitchenAid Extension, an internal developer tool for automating rule creation in Capital One's Eno Web Assistant — leading the full design process from sketches to high-fidelity Figma prototypes and improving task completion from 51% to 94% through iterative usability testing.
- Integrated directly with Figma as a developer, bridging engineering and design by collaborating in design critiques, workshops, and building a reusable component library to ensure design system consistency and accelerate development.
- Orchestrated a patent-filing workshop that resulted in a 200% increase in patent submissions.
- Facilitated accessibility initiatives and workshops to drive broader team engagement.

---

## Education & Credentials

### VIRGINIA TECH

#### **Bachelor of Science (BS) in Computer Science** 2016

### GENERAL ASSEMBLY

#### **UX Design Intensive**

#### **Visual Design Certification**

---

## Honors

### UNITED STATES PATENT & TRADEMARK OFFICE

#### **25 Patents Awarded**

### ADOBE CREATIVE JAM

#### **Honorable Mention** (*Nov 2020*)
